

TECHNICAL NOTICE SnowPlak® Trek

Concept :

Snowshoe adaptable to any hiking or ski boot, sizes 36-46.

Trek-a model: for boots with a rear groove (lever crampon + front strap).

Trek-b model: for boots without rear groove (crampon with 2 flexible straps).

The SnowPlak-Trek consists of:

- U-shaped aluminium plates with side knives.
- Grivel Air Tech Lite Wide New-Matic (Trek-a) or New-Classic (Trek-b) crampons
- Aluminium tube attached to the crampon with manual adjustment.

Weight, dimensions: 1.3kg per pair with crampons, 23x34cm

Material: orange anodised aluminium plate.

Use :

The efficiency of this patented concept is incomparable on steep slopes. Its exceptional grip will make you feel secure when crossing and descending.

The 12-point Grivel aluminium crampons combine ease of use with walking comfort. The quality of its materials is excellent. It can be dismantled for a classical alpine use.

The side and front knives of the plate enter the snow layer when climbing and traversing. The technology of this 12-point crampon makes the heel plant very effective on all types of snow when descending. Its low position under the plate allows a natural and fluid walk in all circumstances on steep terrain.

These compact and light snowshoes will easily fit in your day backpack.

You will then experiment with more complex terrain and extend your adventure.

Safety :

SnowPlak should only be used for hiking on snow. Snowshoes are not suitable for classical alpine mountaineering, except on approach.

Grivel Air Tech Lite Wide New-Matic (Trek-a) or Air Tech Lite Wide New-Classic (Trek-b) aluminium crampons

(Non-contractual pictures)

The compatibility with the crampons mentioned or represented is based on tests carried out by SAS SnowPlak alone. The responsibility of Grivel company cannot be engaged in any way.
